DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 8 both recite limitations which appear to be contradictory to what is known in nature. Specifically, the applicant claims that the liquid is supplied from above in the direction of gravity, yet also claims that the discharge of vaporized vapor is upwards in the direction of gravity. It is unclear how a flow of liquid from above in the direction of gravity (which herein is interpreted as being downward) is the same direction as the vaporized vapor which is upwards.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimazu (6,776,809). Shimazu discloses a vaporizer (12) that vaporizes a liquid to generate vapor and includes a plurality of heating gas flow paths (42) through which heating gas circulates, a plurality of vaporization flow paths (44) that are provided with porous bottoms (55R, 56R, SEE column 6, lines 41-61) and are located such that they can exchange heat with the heating gas flow paths, and that vaporize the liquid that is supplied from above (SEE Figure 2, water fed to heat exchanger 40, also SEE Figure 24) in the direction of gravity, and that discharge the vaporized vapor will inherently rise upwards, a plurality of fins (43, 45) (offset fins are shown in Figures 2 & 6 as per claim 4) that are provided on an inner surface of the vaporization flow paths. With regard to claim 2, the plurality of heating gas flow paths and the plurality of vaporization flow paths are placed so as to alternate with each other (as per Figures 2, 6, 24, 26).

Art Unit: 3749

Evidence of a portion of each of the plurality of heating gas flow paths is provided in a substantially orthogonal direction relative to the plurality of vaporization flow paths is shown in Figure 2. With regard to claim 7, the liquid is a liquid fuel containing a hydrocarbon and the vapor is a fuel vapor used for fuel reformation (column 4, line 11-40).

Allowable Subject Matter

Claims 8-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory A. Wilson whose telephone number is (571)272-4882. The examiner can normally be reached on 7 am - 4:30 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve McAllister can be reached on (571) 272-6785. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
